

## Patients Can't Afford Lab Tests?

- P.A.L.S., working with a national laboratory, now can help.
- We offer over 85 commonly ordered blood tests.
- Most cost \$5 each, with some costing \$10, \$15 or more.
- This offer is available in all states (except Hawaii).
- All testing is confidential. Results are sent to both you and the patient.
- There is no upfront cost to your clinic. Either the patient pays or we can bill your clinic.

## Help is here!

## Patient Assistance *for* Lab Services

**A Service of  
The Own Your Health Partnership  
and NeedyMeds**

## How It Works

### The process is simple:

1. Enter the patient's information in box 1.
2. The provider enters the tests order in box 2.
3. Payment information is entered in box 3.
4. If payment is by credit card or bill to the clinic, you fax the form. If payment is by check, mail the form.
5. The patient receives a box with tubes and collection instructions.
6. Results are sent to the patient and the provider.

## What Are the Costs?

We kept the cost of the tests simple. Most are \$5 each, some are \$10, \$15 or \$20 each. There are a few that are more expensive.

These prices are much less than you would pay at most labs. And you know the cost upfront before the tests are.

There is a one-time \$15.00 fee for shipping and processing. This fee is the same no matter how many tests you order.
